Does every McDonald's in the world look the same?

Yeah, more or less.

In this 15 round quiz, various #desertbus members were sent on a mission:

visit your local McDonald's and take four photos - two of the interior, one of the exterior, and one looking across the street.

For each location, you'll be shown the photos one at a time.

Your job: guess which city it's in, choosing from six plausible options.

The geographically closer your guess is, the more points you get.

You get bonus 2 points if you lock in your guess before you see the exterior shot and a bonus 1 point if you lock in your guess before you see the picture of the opposite street.
